

Professional Summary

- Manual QA Tester with over 3 years of experience in testing web applications and mobile apps (iOS and Android).
- Proficient in developing and executing test plans, test cases, and maintaining detailed test documentation.
- Hands-on experience in mobile application testing across both Android and iOS platforms.
- Skilled in functional, usability, and compatibility testing of web applications across multiple browsers and operating systems.
- Well-versed in QA and defect tracking tools such as Jira.
- Strong understanding of SDLC and STLC, with practical experience in Agile/Scrum environments.
- Collaborated effectively with cross-functional teams including developers, business analysts, clients, and project managers to deliver high-quality software.
- Adept at preparing QA artifacts including test estimations, test scenarios, test data, test summary reports, and daily/weekly status updates.
- Applied risk-based testing techniques to prioritize test cases and improve test coverage.
- Conducted performance testing to enhance application speed, reliability, and overall user experience.

Technical Skills

- Defect Tracking: JIRA
- API Testing: Postman, SoapUI
- Databases: MS SQL Server, PostgreSQL
- Automation Tool: Selenium WebDriver (Java)
- Frameworks: TestNG, BDD (Cucumber), Data-Driven, Hybrid

Professional Experience

Feb 2022 - Present Software Test Engineer, Outstager Consultancy Services Private Limited, Chennai

- Developed and implemented a comprehensive test strategy, resulting in enhanced test coverage and reduced post-release defects.
- Managed the end-to-end testing lifecycle including test planning, test case design, script development, defect tracking, and quality assurance ensuring the delivery of high-quality software.
- Conducted performance testing to improve application speed, responsiveness, and user experience.
- Applied Agile methodologies and Scrum practices throughout the software testing lifecycle.
- Improved testing efficiency by introducing basic automation, leading to reduced execution time and increased productivity.
- Identified and resolved critical bottlenecks, contributing to the delivery of stable and high-quality software.

- Collaborated effectively with clients, developers, business analysts, and project managers to align QA efforts with project goals.
- Designed and executed manual test cases to verify software functionality, reliability, and performance across various platforms.
- Analyzed Business Requirement Documents (BRDs) to define project scope and derive detailed test plans.
- Performed testing across web, mobile (iOS and Android), and desktop platforms to ensure consistent functionality.
- Executed multiple types of testing including functional, integration, system, regression, and user acceptance testing (UAT).
- Maintained structured and reusable manual test cases to support regression testing and traceability.
- Participated in peer reviews of test plans, test scripts, and test data to ensure test quality and complete coverage.
- Documented all test results, issues, and progress using tools such as JIRA.
- Adhered to standardized testing procedures for validating new builds, patches, and software releases.

Projects

Dec 2024 - Present

Asateel Tech Upgrade

- Focused on optimizing system performance, scalability, and deployment stability.
- Collaborated with developers for smooth feature rollouts and production readiness.

Feb 2022 – Nov 2024

Asateel

- Government platform for transportation regulation compliance under Abu Dhabi ITC.
- Focused on validating end-to-end workflows, cross-platform functionality, and regulatory compliance.
- Tested features related to vehicle registration, fleet management, driver registration, permits, and more.

Certifications

ISTQB Certified Tester – Foundation Level

Certificate No.: 22-CTFL-211360-12

Education

2016 – 2020

Bachelor of Engineering (B.E.) – Electrical and Electronics Engineering

Prince Shri Venkateshwara Padmavathy Engineering College (Affiliated to Anna University)
