## Career Objective:

---

A dedicated **Manual Tester(QA Tester)** with 2.10 years of experience in testing web and mobile applications. Skilled in creating test plans, executing test cases, and identifying defects to ensure high-quality software. Looking to contribute my testing skills and collaborate with a team to help deliver reliable and user-friendly applications. Eager to continue learning and grow in the field of software testing.

## Professional Expertise Summary:

---

- **2.10 years of hands-on experience** in manual testing of web and mobile applications, ensuring high-quality software delivery.
- Proficient in **requirement analysis**, creating detailed **test cases**, and executing comprehensive **manual tests** (functional, regression, smoke, and exploratory)
- Experienced in **defect reporting and tracking** using tools like **JIRA** and **Toad** ensuring clear communication and prompt issue resolution.
- Skilled in performing **cross-browser, compatibility, and usability testing**, ensuring consistent user experience across different platforms and devices.
- Adept at conducting **user acceptance testing (UAT)** to ensure applications meet business requirements and end-user expectations.
- Strong collaboration with **development teams** to reproduce and resolve defects, ensuring timely fixes and software stability.
- Excellent attention to detail in identifying and documenting defects, providing accurate steps to reproduce, and categorizing issues by severity.
- **Continuous learning** of industry trends and best practices, constantly improving testing techniques and processes to optimize efficiency.
- Solid understanding of **SDLC (Software Development Life Cycle)** and **STLC (Software Testing Life Cycle)**, with a strong ability to adapt to various project needs.
- Committed to maintaining the highest standards of software quality while delivering projects within time constraints.
- Actively participated in daily Meetings And Discuss With Team Members.
- Having Knowledge on Q-test, Tidal Automation, WinScp Applications.

## Work Experience

---

Project : Capital District Physician health plan(Health insurance for New York)  
Role : Associate Consultant Reporting Location : Chennai  
Company : Atos Syntel. (Aug2022 to Present)

Project Description : Founded by Capital District Physicians, CDPHP has a history of providing

quality coverage and top-rated health plans to thousands of families for more than 30years. CDPHP provides managed healthcare service to the users using Claim process tool Facets. Facets is an integrated healthcare management system designed to handle the complex requirements of the managed care programs. It's a comprehensive client/server based system that integrates eligibility, provider and plan/product data to effectively process claims, utilization management, reviews, case management and customer.

#### Roles & Responsibilities:

---

- Worked on **Health Plan Member Profile Application** in **multiple browsers**.
- Analyze **functional and non-functional requirements** to create **test plans** and **test cases**.
- **Design comprehensive test cases**, ensuring **full test coverage** based on requirements.
- Involved in **GUI testing, Smoke Testing, Functional testing, Regression Testing, Ad-hoc Testing**.
- Performed in **Functional/Regression Testing, Smoke/Sanity Testing**, and **Interface testing** for web application by including possible **positive/negative test cases** after each change in the platform.
- Troubleshoot **tidal jobs** and **software issues**. Work directly and assist the **Offshore** and **in-house developers**, and **confidential responsibilities**.
- **Re-execution of test cases** against modified build for ensuring the **bug fix** work. Working on **WinSCP Applications** and **tidal automation** to run the jobs by using **Chrome**.
- Create and maintain **test execution reports**, providing insights into **test progress, pass/fail status**, and **defect outcomes**.
- Work closely with **developers, product managers**, and **QA teams** to provide feedback and ensure alignment between requirements and test coverage.
- Conduct **user acceptance testing** to validate software against **business requirements** and **end-user needs**.
- Actively participated in **daily meetings** and provided feedback from **QA standpoint**.
